

## **Kaptiche in Warehousing and Logistics**

It is an erroneous belief that a warehouse is not more than a storage space. The truth is, warehousing is pivotal for growth of the supply chain, stabilize the price, and to encourage mass production of goods. It serves as the center point for supply chain and other value-adding processes of goods.

Proper documentation of the incoming and the outbound goods would run a warehouse successfully. But, despite having a well-organized warehouse, handling a large volume of paper documents is still a challenge to the industry. How to effectively capture this crucial information buried in those documents?
