

Can't Afford Your Lab Tests?

- P.A.L.S., working with a national laboratory, now can help.
- We offer over 85 commonly ordered blood tests.
- Most cost \$5 each, with some costing \$10, \$15 or more.
- This offer is available in all states (except Hawaii).
- All testing is confidential.
- Both you and your doctor receive a copy of the results.

Tests Offered

Can't afford your lab tests?

PALS
PATIENT ASSISTANCE for LAB SERVICES

Help is here!

Patient Assistance for Lab Services

**A Service of
The Own Your Health Partnership
and NeedyMeds**

How It Works

The process is simple:

1. Go to **PALS-LABS.org** and download the order form.
2. Complete box 1 (Patient Information) and box 2. Payment Information) on the order form. Remember to sign the form in box 2.
3. Print the order form and list of available tests.
4. Have your provider complete box 3 (Provider Order). The provider must sign the form.
5. If paying by credit card have the provider fax the form to the address in box 4. Otherwise, mail the form and check to the address in box.

What Are the Costs?

We kept the cost of the tests simple. Most are \$5 each, some are \$10, \$15 or \$20 each. There are a few that are more expensive.

These prices are much less than you would pay at most labs. And you know the cost upfront before the tests are.

There is a one-time \$15 fee for shipping and processing. This fee is the same no matter how many tests you order.

What's Next?

Here's what happens:

- The order form is completed and you send it with payment.
- Within two weeks you receive a box with information on where to go to have your blood collected. Bring the box and all its contents.
- Once the specimens are sent you will receive your results within two weeks.
- A copy of your results is sent to your provider if s/he requests them.

PALS is not able to provide medical advice. Contact your medical provider for any questions related to your test results.
